

Paper 2 (ESEC/FSE 2020)

- *Laaber, C., Würsten, S., Gall, H. C., and **Leitner, P.** Dynamically reconfiguring software microbenchmarks: Reducing execution time without sacrificing result quality. In Proceedings of the 28th ACM Joint Meeting on European Software Engineering Conference and Symposium (ESEC/FSE 2020)*
 - Another publication pertaining to JMh benchmarking. The paper proposes a new approach to reduce benchmarking times with the goal of integrating microbenchmarking into continuous integration pipelines. The first author was my doctoral student at the time of writing, and ESEC/FSE is one of the two A*-ranked software engineering conferences.
